

ATOMIC DESIGN

PARIS

TURNING MYTHICAL CARS DESIGN INTO GOLD

www.atomic-design.paris

ETERNAL DESIGN

The first ATOMIC DESIGN wish is to pay tribute to the designers who created the lines of the most legendary automobiles.

THE IDEA

The creator of ATOMIC DESIGN had an idea in mind for a long time: to create metallic silhouettes, sublimating the shape of dream cars. And he had also the wish to have a giant E-Type on his desk, the contemplation of its incredible design would help in thinking moments.

THE STORY

A meeting with a French specialist of gold was decisive, when he was speaking about his knowledge of coating with the three colors of gold. This concept suddenly emerged as an evidence: it would be really exceptional for car enthusiasts to compose a box with some classic cars in different colors of precious metals. A collection of exceptional cars in three different golds was born!

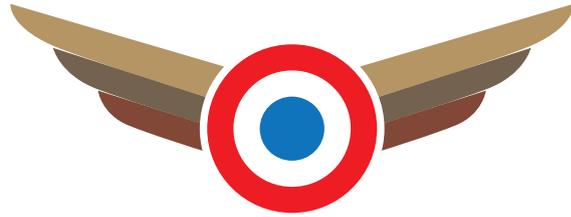

LUXURIOUS SPIRIT

You are the one choosing the cars and the colour of gold coating on each one. And the best way to highlight your favorite designs is to select this luxurious box, which is systematically delivered in a pilot travel bag.

FRENCH TECH

ATOMIC DESIGN was born in Paris, the city of luxury. Each step of the process has been approached with a strong will: everything has to be made in France. Our designer is French, metal milling is realized in the west of France, gold coating is processed near Paris, pilot travel bags were designed by a French Automobile Club. One exception: the cabinetmaker who makes the wooden boxes is French, but lives in Switzerland!

KING SIZE EVOCATIONS

Another strong wish of Atomic Design creator: offering to automobile design enthusiasts a huge sculptural evocation, measuring approximately 50 cm.

LIMITED EDITIONS

Each evocation of a famous car design is limited. At launch, ATOMIC DESIGN decides to manufacture 1 to 5 units of each single silhouette, each one of them is individually numbered. You must get sure to acquire an exclusive object, an exceptional financial investment. Only a very limited number of fellow privileged will have the chance to proudly own a 250 GTO evocation or a huge full black anodized E-Type evocation!

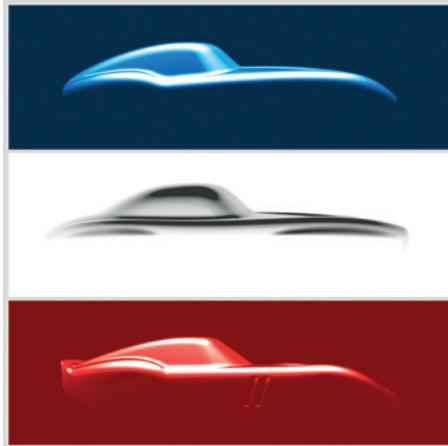

MADE IN FRANCE

FRENCH DESIGN

Vin100 is the artistic name of our designer. He's always been drawing cars. Vincent is living in France. We can also spend time together to discuss about each car project, about design and interpretation of the following models.
Each ATOMIC DESIGN object bears the artist's signature.

Vin100

FRENCH PRODUCTION

The firm we've chosen for this luxurious project is established in Britain. It was essential to work closely and on the same territory, and for sure to work with a French firm. French luxury is a state of mind, Atomic Design has been build around this spirit : our french luxurious objects have to be fully made in France.

REAL GOLD!

The laboratory of our expert in gold coating is near from Paris and each evocation of Atomic Design passes through his expert hands.
This partner use only recycled gold and has a fairmined licence, in order to diversify its gold sources by the end of 2020 and thus support artisanal mining communities in their economic and social development and to ensure the limitation of the environmental impact linked to gold extraction.
Each ATOMIC DESIGN object bears the punch of the gilder.

 9.000 € HT

Natural anodization
 10.440 € TTC
 8.700 € HT

The sculptural lines of a famous english car, with this unfinished front hood, are recognizable among all others! This art object is made of aluminium milled in the mass. Specific inscriptions with the limited edition numbering are engraved on the bottom of the silhouette. A long and delicate work of polishing is following, up to get a perfect mirror effect. Gold covers finally this sculptural object, in white, yellow or pink.

The gold coating is realized by one of our providers who works in an absolute sustainability way. This partner use only recycled gold and has a fairmined licence, in order to diversify its gold sources by the end of 2020 and thus support artisanal mining communities in their economic and social development and to ensure the limitation of the environmental impact linked to gold extraction.

As you choose the evocative shape, the color of gold, it makes your sculpture unique. By the way, the piece is numbered. This implies manufacturing as and when requested. We ask you to be patient and understanding, because the complete process of production, quality monitoring and packing takes about ten weeks. Depending on the different schedules of our partners, the time may be reduced, and we will keep you informed about the evolution of the delivery time by email. You can be sure that we do the best for your satisfaction.

3 Golds Box

Leather and wood
Full carbon inside
3.120 € TTC
2.600 € HT

The best way to highlight your three golds collection: this wooden box, hand made by a cabinetmaker! Inside, each evocation is screwed on a mobile wooden plate covered by suede fabric. A little satin tongue will help you.

Outside, you can choose the color of the synthetic leather inlays.

On the top of the box, an aluminium plate signs this luxurious set «ATOMIC DESIGN». When you choose this Triple Gold Box, you'll receive it in a leather pilot weekend travelbag. This box has been elaborated exclusively for ATOMIC DESIGN by our cabinetmaker, custom made, hand made, passion made! Each box is realized with real wood, worked, sanded, varnished and customised for the shake of perfection.

Finishing : Lighthouse Red – Cosmos Black – Snow White – Atlantic Blue – Racing Green – Sienna Brown

Your sculpture is unique, because you have chosen the evocative shape, the color of gold, and the piece is numbered. This implies manufacturing as and when requested. This is why we ask you to be patient and understanding, because the complete process of manufacturing, quality monitoring and packaging takes about ten weeks. Depending on the different schedules of our partners, the time may be reduced, and we will keep you informed of the evolution of the delivery time by email.

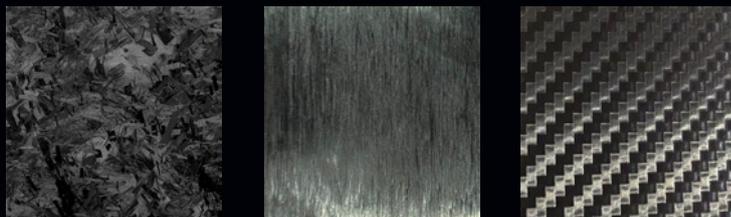

King Size

King Size Evocation
 Black or Natural anodization
 19.800 € TTC
 16.500 € HT

Each evocation developed by Atomic Design is available in "King Size". That means 2,5 times bigger than the gold coated models. This art object is made of aluminium milled in the mass. Specific inscriptions with the limited edition numbering are engraved on the bottom of the silhouette. A long and delicate work of polishing is following, up to get a perfect mirror effect. Anodization covers finally this sculptural object, in natural or black color. You can see in this picture the size ratio between an evocation and it's King Size version.

Carbon base

Your favorite evocation will be now screwed on a carbon base. You just have to choose the pattern, between forged, linear or woven carbon. An adhesive black velvet is applied below, to avoid scratches on your furniture. This part is included in the evocation price.

Your Evocation

Your favorite car is not in our list of evocations! Atomic Design will grow this list over time. But in the meantime, we can personalize each project. And if you wish a specific car, we can develop this for you. This is our prestation called "your evocation".
